

GRIGORIOS KARIANAKIS

Unity Game Developer

Solo Developed
Published in Google Play Store
Awarded Best Mobile Game in Greece 2024

Who I am

Self-taught game developer with 4 years of experience developing games in Unity and C#. Released Space Yucca, an award-winning commercial mobile game. Passionate about gameplay programming, technical problem solving, and creating maintainable game systems and game feel.

What I am looking for

My goal is to further develop my programming expertise while contributing meaningfully to the creation of high-quality games. I'm willing to relocate internationally to join a larger game development community.

The journey

Over the past few years, I have focused on learning the ins and outs of game development using Unity. I completed my first commercial game, an arcade shoot-'em-up titled Space Yucca, and released it for Android in 2024. My work was recognized by the Greek game development community and received the Best Mobile Game in Greece award in 2024.

During this process

I developed advanced proficiency in the Unity game engine and am confident using it to develop games across a wide range of genres.

I built a strong foundation in programming, expanding beyond the Unity ecosystem.

Additional Skills & Experience

Strong theoretical foundation in mathematics and physics gained while studying at the School of Applied Mathematical and Physical Sciences, National Technical University of Athens (NTUA)

Experience in all-around game development, including custom inspectors and editor tools for faster testing, HLSL shader programming, Unity Shader Graph, creating animations through code. Experience implementing cloud saves, leaderboards, Google Play

In-App review API, Google Play Store publishing workflows and Unity-Godot cross-engine tools.
